

## COMPANY

IN 1997 EMS Shipping & Trading GmbH decided to engage in the transportation of high-quality goods such as yachts and their accessories. At that time EMS Shipping & Trading GmbH had already been working in the transport sector for more than 20 years.

AT THE BEGINNING OF 2008, the section of yacht transportation, spare parts and accessories was taken over by Global Boat Shipping GmbH & Co. KG. Under the new name, the previous team offers the accustomed first-class and independent service, guaranteeing safe and reliable transportation.

## WORLDWIDE YACHT TRANSPORT

RELIABLE

FLEXIBLE

CONSCIENTIOUS

## PROFESSIONAL TRANSPORTATION

WITH MORE THAN 10 YEARS EXPERIENCE in transporting yachts worldwide by ship, plane and lorry, Global Boat Shipping is one of the preferred transportation agencies worldwide for motor and sailing yachts.

WE DEVELOP COMPLETE TRANSPORT SOLUTIONS for goods of any kind in the worldwide door-to-door service. To do so, we co-operate with long-standing and experienced partners at home as well as abroad. The sophisticated logistics incorporate the interaction of transportation routes – whether this be by lorry, rail, plane or ship. When planning the transportation, we can rely on efficient partners.

## INDIVIDUAL LINER SERVICE

THE PROXIMITY AND GOOD CONTACTS to the shipping companies enable us to be flexible in the choice of routes and times of departure; in addition we also offer regular lines from Northern Europe to the Mediterranean or to the Caribbean and back.

DUE TO OUR LONG-STANDING PARTNERSHIPS in the ports specific contacts will always be available to offer advice.

## QUESTIONS & ANSWERS

### WHAT ARE THE ADVANTAGES OF SEA TRANSPORT?

There are two main reasons which are increasing the popularity of transporting yachts by sea:

- ✦ Increasing size of yachts making transportation by lorry almost impossible.
- ✦ Saving time in worldwide destinations such as the Mediterranean or the Caribbean: You don't go on board until the yacht has reached the destination of your choice.

### WHICH SEAGOING VESSELS CAN TRANSPORT YACHTS?

Principally, nearly every type of transport vessel is suitable for transporting yachts. The choice of vessel depends on the shipping route.

### WHEN ARE YACHTS TRANSPORTED AND WHERE TO?

Due to the strong demand of this transport service, we launched a regular service from Northern Europe (e.g. Bremen or Southampton) to the Mediterranean (e.g. Gibraltar or Palma) seven years ago. We currently have at least one departure from or to the Mediterranean a month.

### HOW SAFE IS THE YACHT DURING THE TRANSPORTATION?

Each type of yacht is transported in a special rack which we produced ourselves and lashed firmly. Of course, it is also possible to use your own rack. However, its seaworthiness should be ensured beforehand.

### YOU WILL FIND FURTHER QUESTIONS & ANSWERS ON THE INTERNET

E.g.: What condition should the yacht be in? Does the yacht have to be insured for transportation? What happens to the yacht at the port of destination?
