

Catamaran on its way to Abu Dhabi

May 26, 2014 - „Windcat 101“ is now on its way to Oman. The catamaran was loaded this weekend in Antwerp onto the "Rickmers Chittagong". Global Boat Shipping (GBS) arranges the transport of the 115 tons vessel to the Persian Gulf.

During the last three years the catamaran transported workers to and from the east coast of England to wind farm construction sites in the North Sea. In future „Windcat 101“ (Length 28 meter, 9,6 meters beam) will be used as a work boat off the coast of Abu Dhabi. "As experts in worldwide yacht transport Global Boat Shipping is the ideal partner for transports of this kind", Manfred Müller, CEO of GBS, says.

„With our extensive practical experience in Lift on/Lift off transports of yachts world wide we are able to offer our clients a tailor made solution as we have proved in this case. We provide a complete package including stowage planning and the supervision of loading und discharging by our own staff,“ adds Christian van Hoorn, Managing Director of GBS.

GBS with offices in Leer, Hamburg, Genoa, Ft. Lauderdale and Vancouver is active in world wide yacht transport. The company has recently joined forces with BBC Chartering. This gives GBS access to the fleet of one of the leading multi purpose shipping companies thus allowing GBS to offer fixed sailing schedules to and from the Caribbean, the Mediterranean, the Middle and the Far East.

Press Release

GBS is member of EMS-Fehn-Group, which consists of 12 companies with offices in Leer, Bremen, Hamburg, Helsinki, Riga, Bolzano, Genoa, Palermo, Durres, Skopje, Ft. Lauderdale and Vancouver. EMS-Fehn-Group is active in chartering, logistics, yacht transport, ship management, stevedoring, terminal operation, warehousing and crewing.
